

# HLA Secure Fund (HLASF)

June 2024

## Fund Features

### 1. Investment Objective

To provide investors with steady and consistent return over a long-term investment horizon by investing into local and global fixed income securities and equities.

### 2. Investment Strategy & Approach

The strategy is to provide investors an affordable access into a diversified investment portfolio with a mixture of equities and fixed income instrument. The fund will invest primarily in fixed income instruments such as bonds, money market instruments, repo and deposits with financial institutions that provide regular income as well as in high dividend yield stocks to enhance the fund's returns. The asset allocation decision between fixed income instruments and equity is decided after considering the fixed income and equity market outlook over the medium to long-term horizon. Initially the fund will invest by feeding into Affin Hwang Select Income Fund ("Target Fund"), with the option to increase the number of funds or replace Affin Hwang Select Income Fund with other fund(s) in future. The Target Fund will invest primarily in Asia pacific excluding Japan companies.

### 3. Asset Allocation

The fund shall invest a minimum 70% of the NAV in Fixed Income Instruments and maximum 30% of NAV in equities.

### 4. Target Market

The fund is suitable for investors who are relatively conservative and wish to have a steady and stable return that meets their retirement needs.

## HLA Secure Fund (HLASF)

### Market Review, Outlook & Strategy relevant to Target Fund

US equities advanced in June, with the S&P 500 index rising by 3.50%, as supportive macro data fuelled optimism about potential rate cuts by the US Federal Reserve (Fed). The S&P 500 continued its upward momentum, recording gains of 14.50%, while the tech-centric Nasdaq index posted gains of 18.10% in the first half of 2024. A key inflation gauge closely followed by the Fed aligned with estimates, increasing by a seasonally adjusted 0.1% for the month, marking the smallest increase so far this year. The 12-month core inflation rate cooled to 2.6% also matching forecasts. Other economic signals such as weak retail spending, further bolstered bets that the Fed would pivot to cut rates. Retail sales rose by a modest 0.10% in May, coming below expectations, with weakness observed across various broad categories. Moreover, an uptick in jobless claims showed softness in the labour market. Company surveys also suggest that US companies are starting to slow down on hiring, which could lead to higher unemployment rates.

At its FOMC meeting in June, the Fed kept interest rates unchanged as widely anticipated. In its dot plot, the Fed committee signalled 1 rate cut before the end of 2024, citing incremental progress in lowering inflation. However, the committee telegraphed a more aggressive rate cut path for 2025, revising the projection upwards to 4 cuts from 3 previously. In the political arena, there are growing bets of a potential Trump win in the upcoming US elections. Recent polls have highlighted concerns over President Joe Biden's health and age, particularly following his lacklustre performance in the presidential debate against Donald Trump. In Asia, the MSCI Asia ex-Japan index gained 3.90% in June, with Taiwan and Korea leading the charge. Taiwan's Stock Exchange index surged by 8.80%, while Korea's KOSPI vaulted 6.10%, driven by a significant rally in tech stocks across the region. This uptick follows Apple's announcement of new AI features for its iPhones, which analysts believe will spur a multi-year upgrade cycle that will benefit the tech supply chain.

Indian equities continued their upward trend post-election, with the BSE Sensex Index rising by 6.90%. The ruling coalition led by Prime Minister Narendra Modi won the elections but lost its majority as opposition parties gained ground. Conversely, Chinese equities underperformed, with the MSCI China index closing 2.80% lower in June as economic recovery remains patchy. The manufacturing PMI for June stood unchanged at 49.5 in May, marking its second consecutive month in contraction territory. The People's Bank of China (PBoC) left benchmark lending rates unchanged, maintaining the one-year loan prime rate (LPR) at 3.45% and the five-year LPR at 3.95%. The lack of new policy support announcements from a key financial forum held during the month further dampened investor sentiment.

On the domestic front, the benchmark KLCI closed marginally lower by 0.40% due to profit-taking activities YTD, the KLCI has emerged as one of the best-performing stock markets in the region, posting gains of 9.30% in the first half of 2024. During the month, the government implemented its diesel subsidy rationalisation in Peninsular Malaysia. This measure is expected to save the government around RM4 billion annually. To mitigate the cost increase, the government has introduced policies such as cash aid to eligible individuals and businesses.

In the local bond market, the 10-year Malaysian Government Securities (MGS) yield slipped 2 bps, settling at 3.87%. Overall inflation impact is expected to be relatively muted given the diesel subsidy mechanism comes with targeted handouts. Separately, Fitch affirmed Malaysia's sovereign rating at BBB+ with a stable outlook. This follows S&P and Moody's similar decisions to uphold Malaysia's sovereign rating. Thus, Malaysia's sovereign ratings from all 3 major rating agencies remain at investment-grade (IG) status.

### Actual Annual Investment Returns for the Past Ten (10) Calendar Years

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
<b>Benchmark</b>	10.4%	7.7%	8.2%	2.6%	-2.2%	-0.2%	-3.1%	2.2%	1.1%	8.13%
<b>HLASF - Gross</b>	9.2%	10.2%	5.6%	12.4%	-3.0%	12.3%	6.0%	0.7%	-2.0%	3.2%

Net returns are adjusted for tax and fund management fees.

Those are the actual returns in the past ten (10) years, or since inception if shorter, and are strictly the performance of the investment-linked fund. Thus, the returns are not earned on the actual premium paid of the investment-linked product.

**Notice: Past performance of the fund is not an indication of its future performance.**

The fund was only launched on 14 February 2013. The actual investment returns are calculated based on unit price from 14 February 2013 to 31 December 2013.

### Investment Risks

All investments carry risks. Policy Owners must be prepared to accept certain degree of risk associated with this Investment. The following are the non-exhaustive list of risks associated to this fund.

#### 1. Market Risk

Market risk stems from the fact that there are other economy-wide perils, which threaten all businesses. It is mainly caused by uncertainties in the economy, political and social environment.

#### 2. Liquidity Risk

Liquidity risk is the risk that the fund invested cannot be readily sold and converted into cash. This may arise when the trading volume is low and/or where there is a lack of demand for the security.

#### 3. Country Risk

The foreign investment of a fund may be affected by the political & economic conditions of the country which the investments are made.

#### 4. Currency Risk

This risk is associated with investments that are denominated in foreign currencies. Fluctuation in foreign exchange rates will have an impact on the value of the funds.

#### 5. Concentration Risk

This risk is associated with a feeder fund whereby the investments of such fund are not diversified. A feeder fund invests mainly into another collective investment scheme.

## HLA Secure Fund (HLASF)

### Risk Management

The company has in place its Authorized Investment Framework which forms part of the Risk Management process. The authority framework covers the nature and scope of the investment authority that is exercisable by various parties in managing the Company's investments. The potential investment risks that are taken into consideration in managing the fund include economic conditions, liquidity, qualitative and quantitative aspects of the securities. The investment manager(s) have put in place the following controls to reduce the risks through:

- a) having a flexible tactical asset allocation
- b) investing in a wide range of companies across different sectors
- c) setting prudent investment limits on various exposures
- d) taking into account the liquidity factor in selecting securities
- e) engaging in the hedging of foreign currency exposure where appropriate

### Basis of Unit Valuation

1. The assets of every fund are to be valued to determine the value at which units of a particular fund can be liquidated or purchased for investment purposes.
2. The unit price of a unit of a fund shall be determined by the Company but in any event shall not be less than the value of fund of the relevant fund (as defined below), divided by the number of units of the given fund in issue on the business day before the valuation date, and the result adjusted to the nearest one hundredth of a cent.
3. The maximum value of any asset of any fund shall not exceed the following price:
  - a) The last transacted market price at which those assets could be purchased or sold on the business day before the valuation date; or
  - b) In the case of securities for which market values are not readily available, the price at which, in our Investment Manager's opinion, the asset may have been purchased on the business day before the valuation date;  
plus any expenses which would have been incurred in its acquisition.
4. To ensure fair treatment to all unit holders, the cost of acquiring and disposing of assets is recouped by making a transaction cost adjustment to the net asset value per unit.

### Exceptional Circumstances

The Company reserves the right to defer the payment of benefits (other than death benefit) under this Policy for a period not exceeding six (6) months from the date the payment would have been normally effected if not for intervening events such as temporary closure of any Stock Exchange in which the fund is invested which the Company, in its discretion, may consider exceptional.

### Basis of Calculation of Past Performance

The historical performance of the fund is calculated based on the price difference over the period in consideration compared to the older price of the period in consideration.

$$\frac{\text{Unit Price}_t - \text{Unit Price}_{t-1}}{\text{Unit Price}_{t-1}}$$

For the underlying Target Fund, past performance is calculated after adjusting for distribution and/or additional units, if any.

### Others

HLA Secure Fund is managed by Hong Leong Assurance Berhad (HLA). Any amount invested in this fund is invested by HLA on behalf of Policy Owner in equity, fixed income, collective investment scheme, foreign asset, derivatives and money market instrument/s. If the financial institutions and/or corporations issuing the equity, fixed income, collective investment scheme, foreign asset, derivatives and money market instruments defaults or insolvent, the Policy Owner risks losing part or all of his/her amount that were invested into the instruments on his/her behalf by HLA.

**THIS IS AN INSURANCE PRODUCT THAT IS TIED TO THE PERFORMANCE OF THE UNDERLYING ASSETS, AND IS NOT A PURE INVESTMENT PRODUCT SUCH AS UNIT TRUSTS.**
